

Get Accurate Protection with Our Medicare Set Asides

Don't get caught in the trap of subpar Workers' Compensation Medicare Set Asides. Trust FS Claim Solutions for your WCMSA allocation needs.

We deliver allocations that allow our clients to quickly and efficiently settle claims because of our understanding of regulatory practices. Our industry-leading turnaround times get decisions to adjusters fast. And we set the sector's benchmark with our total dollars submitted vs total dollars approved ratios.

We believe that CMS has issued clear guidelines to follow in the approval process. Don't let another vendor place the blame on CMS for inaccurate allocations, development letters, and counter-higher demands. We examine the cost drivers in the WCMSA to proactively address issues that might trigger denial—before it's submitted.

FS Claim Solutions' WCMSA Advantage:

Fast

Turnaround time in less than two weeks

Comprehensive

Non-clinical factors addressed in legal review

Accurate

Our approval ratios are the industry standard

Quick Approval

CMS approval in less than 30 days on average

Get True Peace of Mind with Our Included MSA Supplement

Sometimes the WCMSA doesn't tell the whole story. But FS Claim Solutions does.

When we prepare your WCMSA, we use the medical information received in accordance with CMS review guidelines to secure quick CMS approval. However, if we discover opportunities that could lower the ultimate projection, we'll include an MSA Supplement alongside the WCMSA.

The recommendations in the supplement can provide substantial savings if an action plan is executed successfully. For cases facing a longer-term settlement, these supplemental recommendations can lower the WCMSA and potentially speed along the settlement process.

Get More with a WCMSA Supplement:

- **Provided at no additional cost for warranted allocations**
- **Outlines medical and legal cost-drivers and opportunities**
- **Includes concise direction and recommended actions**
- **Lays out expected results clearly for adjusters**
- **Lists documentation needed to avoid future CMS action**
